DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claim 1 the related prior art does not teach or fairly suggest "a transmission circuit comprising... a bit control circuit electrically connected between the input units and the output units... the bit control circuit transmitting a bit received by an input unit to an output unit without having the bit passing through other input and output units, a number of bits between the bit received by the input unit and a most significant bit of the first data being different from a number of bits between the bit outputted by the output unit and a most significant bit of the second data...and the bit control circuit further comprises an operating circuit...for performing a logical operation according to a predetermined law on the bits received by the input units to generate the bits transmitted by the output units".

Claims 2 and 4-7 are allowable based on their dependence of independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record below is related to applicant's disclosure.

Zhang et al. Pub. No: US 2002/0159457 A1 discloses a system and method for transporting a compressed video and data bit stream over a communication channel.

Art Unit: 2617
